

Species Scatter Plots

Tiffany Winter

2/4/2022

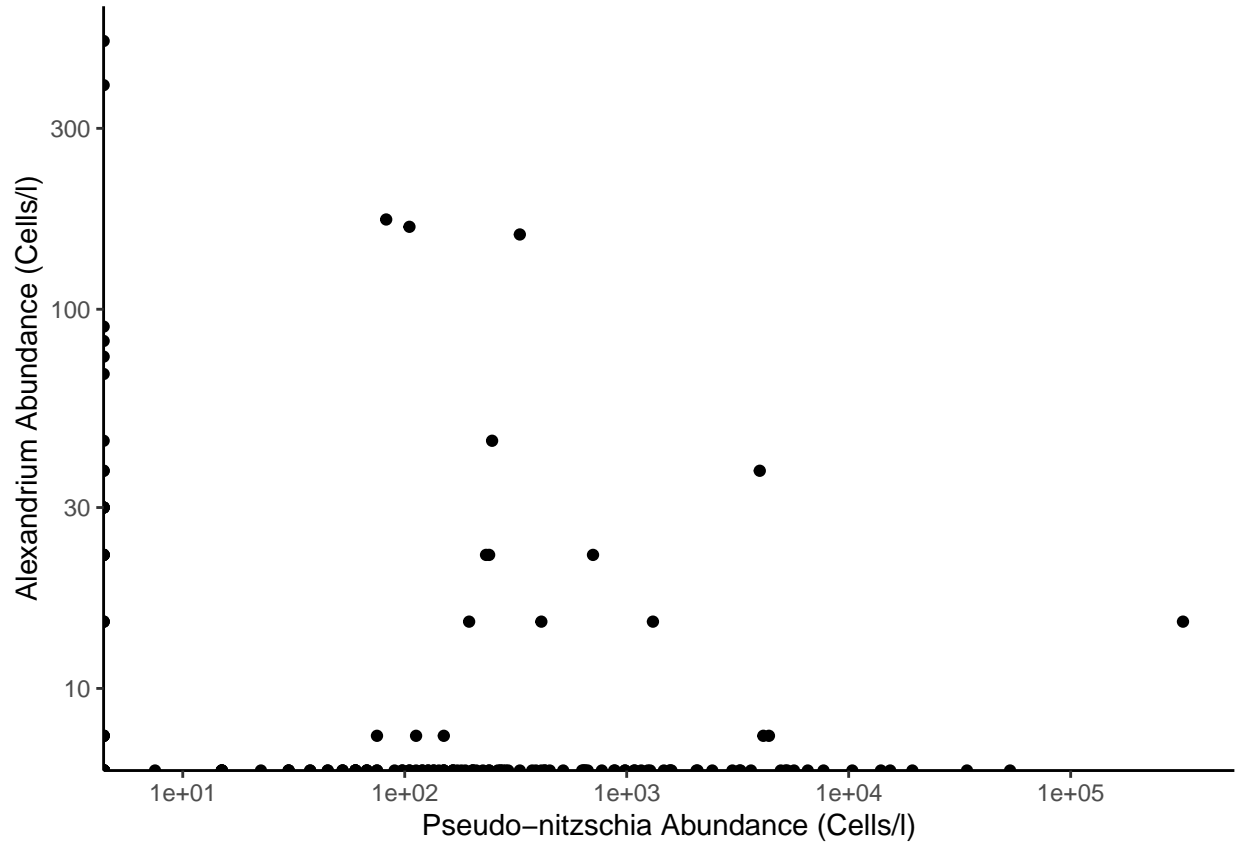

Figure 1: A scatter plot of the abundance (cells/l) of *Alexandrium* against the summed abundance of large ($\geq 3\mu\text{m}$) and small ($< 3\mu\text{m}$) *Pseudo-nitzschia* at the UNH Pier (Newcastle, NH) sampling site.

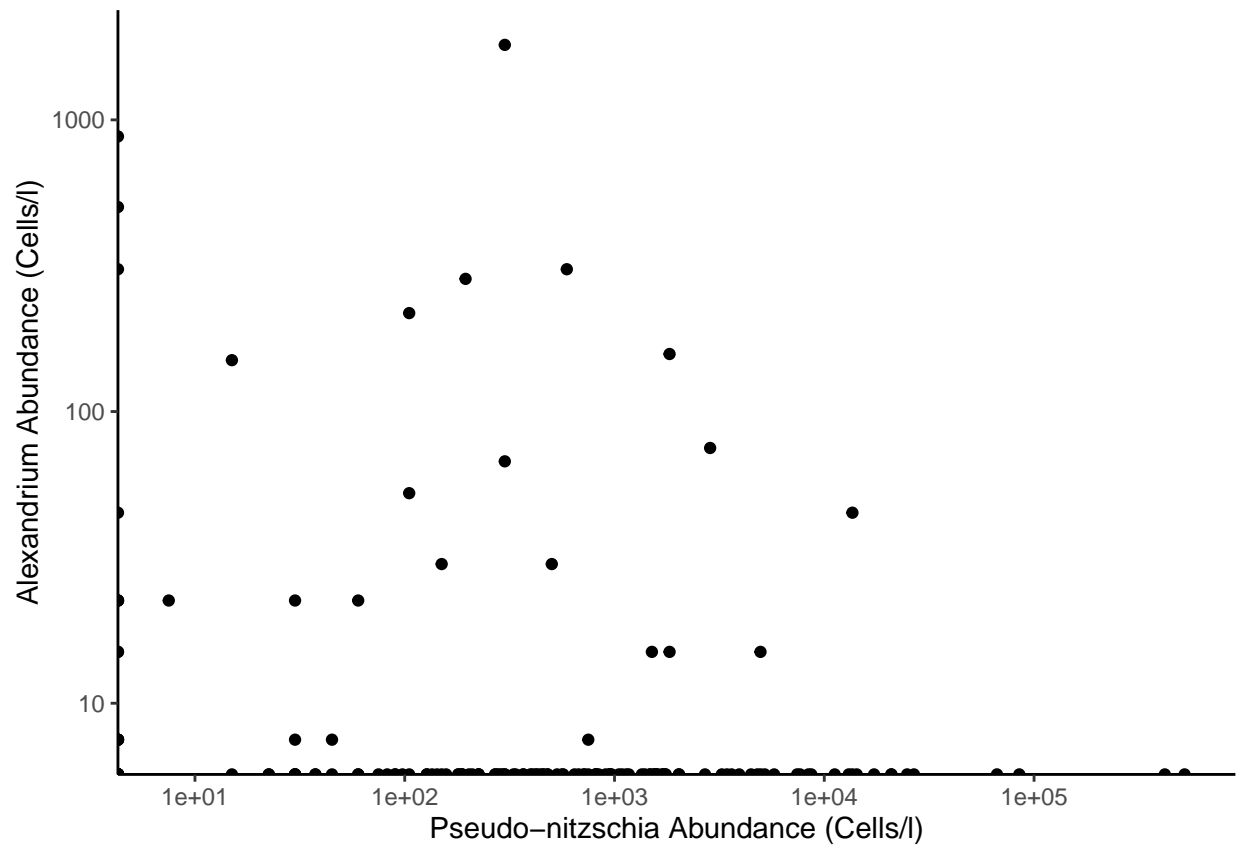

Figure 2: A scatter plot of the abundance (cells/l) of *Alexandrium* against the summed abundance of large ($\geq 3\mu\text{m}$) and small ($< 3\mu\text{m}$) *Pseudo-nitzschia* at the HHHR2 (Hampton, NH) sampling site.
